

THE ROAD TO EVERYONE FOREVER

The Road to Everyone Forever can be broken into 4 main phases. Building Everyone Forever includes access to high quality services and laying the foundation of the sustainable ecosystem that will maintain the services over time. The Forever Focus phase involves strengthening the already established pieces of service delivery - financing, institutional strengthening, and monitoring. The third phase of Oversight Only is really the first phase of exit, where Water For People's involvement includes monitoring support and review in a consultative role. Finally, phase 4, Exit, is our goal, with no Water For People investment or oversight. We are confident services will be sustained over the long term with the institutions, financing, and infrastructure that has been built.

Water For People exists to promote the development of high-quality drinking water and sanitation services, accessible to all, and sustained by strong communities, businesses, and governments.

SUSTAINABILITY LEVEL

- High
- Intermediate
- Basic
- Inadequate

Since 2017, Water For People has assessed progress toward water services lasting Forever.

The Sustainable Services Checklist monitors each district's gaps toward having sustainable water services, considering eight metrics under three categories: service authority, service provider, and water resources management.

This is a tool for districts and countries on the road to achieve the United Nations' Sustainable Development Goal 6 - ensure availability and sustainable management of water and sanitation for all.
