

WATER FOR PEOPLE THEORY OF CHANGE

IMPACT - Improved health, education, economic options, and quality of life for generations.

OUTCOMES - Lasting access to high-quality WASH services for Everyone Forever, accelerating progress toward Sustainable Development Goal 6.

WHAT THAT PROVIDES - Working in collaboration with government, WASH sector, and private sector partners, this provides the foundation and proof to scale sustainable service delivery nationally.

Build political support and ensure appropriate regulation for universal access and a sustainable service environment.

Support comprehensive district WASH planning, define roles, and support capacity-building of government, market, and community institutions.

Ensure services are sustainably financed.

Ensure annual monitoring of level of service and sustainability to promote accountability and adaptive management.

Ensure appropriate infrastructure development and water resource availability and safety.

WHAT WE DO - Advocate for and strengthen WASH systems for effective, sustainable, and scalable service delivery

ASSUMPTIONS:

Improved WASH services are the foundation for sustainable human development, and enhanced economic, health, and education outcomes.

Demand for improved WASH services can be unlocked.
